

ARYAN RANE

aryanrane2006@gmail.com • Mumbai, India • [linkedin.com/in/aryan-rane-5260a2415](https://www.linkedin.com/in/aryan-rane-5260a2415) • github.com/aryannnn-7

Professional Summary

Information Technology student with hands-on experience in Full Stack Development, Cloud Computing, Data Analytics, and Machine Learning. Skilled in React.js, Node.js, Python, AWS, Docker, MongoDB, and Power BI; experienced building scalable web apps, cloud-native systems, and data-driven solutions.

Education

Shah & Anchor Kutchhi Engineering College

BTech – Information Technology

GPA: 8.0+ / 10.0

Mumbai, India

Currently in 3rd Year

Technical Skills

Languages	JavaScript, Python, C++, C
Frontend	React.js, Tailwind CSS, Vite, Javascript
Backend	Node.js, Express.js, MongoDB, MySQL, JWT Auth, REST APIs
Cloud & DevOps	AWS (Lambda, S3, API Gateway), Docker, Jenkins, Prometheus, Grafana, Git, Vercel
ML & NLP	Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Streamlit, TF-IDF, Naive Bayes
Data & Analytics	Power BI (Advanced), Plotly
Security	AES-256 Encryption, Cryptography Fundamentals, Computer Networks

Projects

Legal Rights Awareness Portal *React 18, Node.js, Express.js, MongoDB, Docker, Jenkins, Selenium, Prometheus, Grafana*
— *Live on Vercel*

- Built a full-stack legal education portal covering cybercrime, data protection, and student rights, deployed live on Vercel with a complete CI/CD DevOps pipeline.
- Implemented Docker containerisation, Jenkins CI/CD, Selenium automated testing, and Prometheus + Grafana monitoring; managed sprints via Jira.
- Features interactive flashcard games, scenario-based legal quizzes, and JWT-authenticated user sessions; aligned with SDG 16 (Justice & Strong Institutions).

AegisNet AI – Enterprise Network Intrusion Detection Dashboard *React 18, TypeScript, Vite, Tailwind CSS, D3.js, Recharts, Framer Motion, Supabase, Chrome MV3*

- Built a real-time AI-powered intrusion detection dashboard using an Isolation Forest ML model to score every network packet, with XAI forensics for per-packet feature importance.
- Implemented NLP-based threat classification using TF-IDF and Naive Bayes; built an intent-aware SOC chatbot with semantic search – entirely browser-native, no external API calls.
- Includes a Chrome Extension (MV3) for live browser traffic capture, MITRE ATT&CK mapping, CVE references, attack replay for 7 attack types, and one-click firewall mitigation.
- Collaborated with Dhwannya Pachupate and Sakshi Goswami on the project's development.

CloudFrame – Serverless Image Upload & Processing System *AWS Lambda, Amazon S3, API Gateway, Node.js, IAM, HTML5, CSS3, JavaScript*

- Designed and deployed a fully serverless, event-driven image processing pipeline on AWS – uploads via pre-signed S3 PUT URLs trigger Lambda functions that auto-resize images and generate WebP thumbnails.
- Achieved 100% test case pass rate across all 8 scenarios; warm Lambda invocations averaged 2.1s. Enforced least-privilege IAM, 5-minute pre-signed URL TTL, and 7-day S3 lifecycle expiry.

SentiScope – Twitter (X) Sentiment Analysis *Python, Flask, scikit-learn, TF-IDF, Logistic Regression, joblib, Chart.js, Pandas*

- Trained a scikit-learn Logistic Regression + TF-IDF pipeline on 50,000 tweets (Sentiment140) with bigram feature extraction, L2 regularisation, and model serialisation via joblib.
- Deployed as a Flask web app returning real-time sentiment predictions with per-class confidence scores visualised via Chart.js; custom tweet-cleaning pipeline handles URLs, mentions, and hashtags.

Air Quality & Weather Monitoring and Forecasting *Python, Streamlit, Pandas, NumPy, scikit-learn, Plotly, Meteostat API*

- Built a Streamlit dashboard merging synthetic air quality (PM2.5, PM10, NO2) and real Mumbai weather data, performing EDA with correlation analysis between wind speed, humidity, and pollutant levels.
- Trained Linear Regression and Random Forest models for pollutant forecasting; predicted graphs closely matched actual pollution trends.

FlavourMap – Indian Food Dataset EDA & Visual Analytics *Python, Pandas, Matplotlib, Seaborn, Power BI, Google Colab*

- Performed full EDA on 6,871 Indian recipes (Kaggle) – including custom time-string parsing, null removal, and column standardisation – generating 6 Python charts and an interactive Power BI dashboard.

Certifications & Courses

- **AWS Academy Graduate – Cloud Foundations** | Amazon Web Services · April 2026 · 20 hours
- **Python Essentials 1** | Cisco Networking Academy / OpenEDG Python Institute · April 2025
- **Networking Basics** | Cisco Networking Academy · December 2024
- **Introduction to Cybersecurity** | Cisco Networking Academy · July 2024
- **Programming Essentials in C (CLA)** | Cisco Networking Academy · April 2024
- **Game Development Using AI** | CogniScience Club, CSI-SAKEC & SAKEC-ACM · March 2025
- **Design Thinking Workshop** | Entrepreneurship & Innovation Cell, SAKEC

Achievements & Activities

- Fullstack Fusion Web Development Hackathon Participant (2024) – CogniScience Club & SAKEC AI&DS
- Research paper authored on Digital Legal Rights Awareness Portal – submitted and under revision for resubmission
- AWS Academy Graduate – Cloud Foundations (April 2026)
- Proficient in full-stack development, cloud computing, and data analytics across 10+ academic and personal projects
